KEY MESSAGES

Swiss quality for the bathroom.

Schneider manufactures all its mirror cabinets and illuminated mirrors in Switzerland. "When you purchase a product from our company, you can look forward to a first-class radiant living room element, designed and manufactured in Switzerland - in short, an original Swiss mirror."

Daniela Koch, Managing Director of W. Schneider+Co AG

Swiss Made – for more than 70 years

Swiss company founded in 1953.

One of the first manufacturers of mirror cabinets in aluminium.

Schneider produces mirror cabinets and illuminated mirrors exclusively in Switzerland at its own factory in Flums SG.

Just-in-time production: Products are ready for delivery from the sixth day after receipt of the order (standard products).

Schneider offers flexible special solutions – thanks to modular lean management and optimal workflows.

 **swissmade**

Quality and service

Schneider offers high-quality, elegant design that integrates perfectly into your individual style.

Schneider uses high-quality and durable materials throughout.

Schneider products are quick and easy to install.

No worries, thanks to reliable Schneider customer service and spare parts availability (spare parts are available for at least 10 years after the end of production).

For small footprints in the bathroom

Sustainable – Schneider takes economic, ecological and social aspects into account.

Schneider's goal is to keep the ecological footprint along the value chain as small as possible.

Minimised CO₂ footprint through work with local suppliers.

Schneider products are made of 100% recyclable aluminium. *

Use of efficient, environmentally friendly LED technology in all products.

* 100% of our aluminium profiles are based on recycled aluminium. This has a used material content of approx. 80%.

The perfect lighting for every bathroom.

Schneider mirror cabinets and illuminated mirrors have a unique spectrum of light colours that can be adjusted from bright make-up light to warm and romantic candlelight.

Lighting technologies at Schneider – from 2000 to 6500 Kelvin

Tunable White: adjustable colour temperature (also light colour) from 2000 to 6500 Kelvin – from warm candlelight to daylight white.

Human Centric Lighting: the light automatically adapts to the needs of the users throughout the day.

Dim2Warm: automatically adjusts the brightness to the most pleasant atmosphere.

Colour temperature and brightness can be controlled via the Schneider app (selected products only).

LED technology: Schneider products are equipped with high-quality, extremely durable LED lights and are dimmable.

The effects of light

Light has always been an integral and fundamental part of the human living environment.

Light helps us to recognise contrasts and see objects.

Light maintains bodily functions, ensures the vital day-night rhythm, stimulates people, relaxes them, and affects attention, performance and well-being.

Bathroom design and light

Every bathroom is different.

Daylight, other light sources and the colour and materials of walls and floors influence the way in which light reflects.

Ideally, the mirror cabinet or illuminated mirror should be specifically adapted to fit the size of the room, conditions and other light sources.

Schneider mirror cabinets and illuminated mirrors are designed in such a way that, in most cases, you no longer need another light source.

reddot winner 2023

Now the moon is rising in the bathroom.

Immerse yourself in a new realm of well-being: the round mirror cabinet - the first of its kind - captivates with its clean lines, mood lighting with Dim2Warm function, and premium materials.

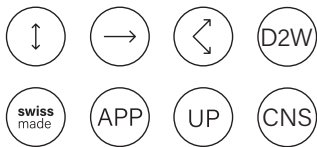

The moon has risen

Bright and clear in the sky, sleek and beautiful in your bathroom: Schneider LUNE D2W, the first round mirror cabinet, captivates with its clean lines, premium materials and enough storage for all your favourite products. The dimmable halo effect casts you and your bathroom in a flattering light. Immerse yourself in the soothing ambience, in a new realm of well-being, and indulge in some you-time.

Dim2Warm function

The glare-free light is emitted in an unbroken halo and can be continuously adjusted using the Dim2Warm function from bright daylight (6500 Kelvin with 100 percent luminosity) to warm white (2000 Kelvin with 30 percent luminosity).

Properties

Light control

Light control by button on the lower edge of the mirror cabinet or via App.

Power socket

Practical socket discreetly placed.

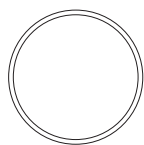

Storage space

Glass shelf and swivel arm offer space for your favourite products.

Durchmesser 74

Optimal lighting, unparalleled radiance.

The **ADVANCED Line Ultimate TW mirror cabinet indirectly illuminates the bathroom with an arc of light. Shadow-free, glare-free, natural and always with the perfect, adjustable brightness for applying make-up, shaving, hair styling and above all: feeling good.**

Key to your well-being

The **ADVANCED Line Ultimate TW mirror cabinet illuminates the bathroom with diffuse, even light. The natural lighting creates a soft, authentic, warm and flattering reflection.**

Key to a good ambience

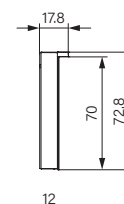

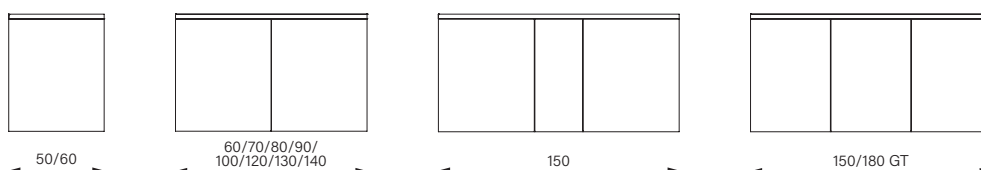

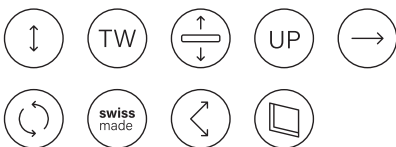

The arc of light indirectly illuminates the bathroom, providing the ideal light for skin care routines with no annoying, harsh shadows. Rather than altering how you look, the light beautifully brings out your natural radiance.

The dimmable Tunable White light feature allows you to alter the light colour according to your mood, from warm to cold and from romantically dimmed to bright daylight.

Installation frame

Can be installed in a flush-mounted version with the universal **INSTALLATION FRAME**.

Properties

Light colours

Dimmable Tunable White LED strip light, light colour from candlelight (2000 K) to bright daylight (6500 K).

Indirect arc of light

Indirect arc of light for exceptional, glare-free illumination of the room and your face.

Membrane keypad

Easy-to-control light functions via integrated membrane keypad.

Colours

Appears to merge with the wall.

ADVANCED Line Superior HCL is the first flush-mounted mirror cabinet from Schneider.

With refined restraint

It can be installed in any wall, from GIS installation systems to brick and drywall partitions. With its refined restraint, it meets the highest aesthetic standards for bathrooms. The backlit handle niche radiates discreet light and makes opening the mirror cabinet particularly comfortable and convenient.

Light adapted to the time of day

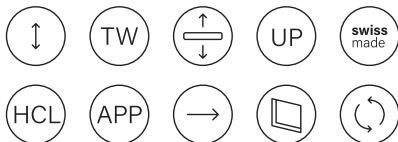

The Human Centric Lighting (HCL) function supports biologically effective lighting: the light adapts to the user's biorhythm, meeting different needs at different times of day.

ADVANCED Line Superior HCL emits the right light for every activity – from make-up application to shaving through to relaxation. The light colour can be adjusted from candlelight (2000 K) to daylight (6500 K) using the app or membrane keypad.

Installation frame

Can be installed in a flush-mounted version with a dedicated INSTALLATION FRAME and BOX.

Properties

App

Convenient control of lighting functions using the integrated membrane keypad or via App.

Opening the cabinet

Optimum cabinet opening thanks to backlit handle niche.

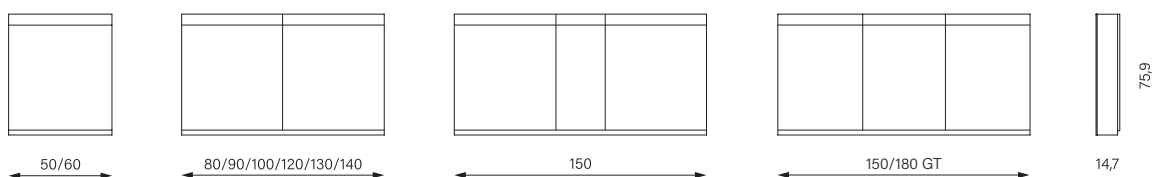

Installation frame

Can be installed flush with the surface and with particular ease in any wall thanks to the Schneider installation frame.

Colour

Grey

Floats before your eyes.

The next generation of the successful **ADVANCED** Line is here. With its doors projecting slightly from the frame, it appears to float in the bathroom - an impression that is further reinforced by the indirect light.

Indirect light for effortless elegance

Inside, a dimmable LED strip light fully illuminates the **ADVANCED** Line Comfort TW. For the first time, this light also provides indirect illumination, giving the bathroom an even more effortlessly sophisticated look.

Hidden light source

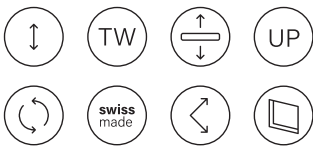

Outside, the light behind the mirror also shines indirectly around the cabinet, providing even, glare-free illumination of the room and your face. The adjustable light colour allows you to change the ambience at will - from a romantic candlelit mood to invigorating morning light.

- Dimmable Tunable White LED strip light inside
- Light colour adjustable inside and out, from candlelight yellow (2000 K) to bright daylight (6500 K)
- Separate on/off switch for internal and external light
- Also available in black with mirrored back panel

Installation frame

Can be installed in a flush-mounted version with the universal **INSTALLATION FRAME**.

Properties

Strip light

Circumferential strip light inside generates unique, indirect lighting effect.

Light functions

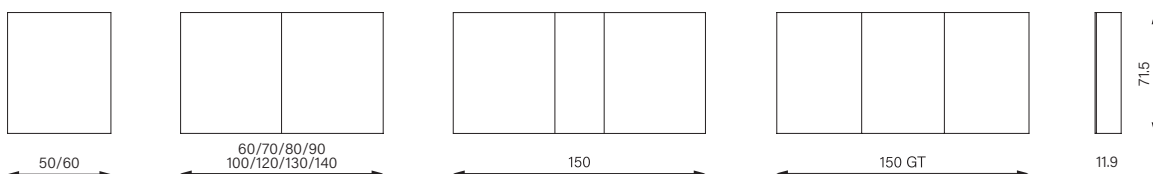

Easy-to-control light functions via integrated membrane keypad.

Light colours

Dimmable Tunable White LED strip light, light colour from candlelight (2000 K) to bright daylight (6500 K).

Colours

The frame your face deserves.

PREMIUM Line Ultimate HCL is surrounded by a narrow LED light frame, which gives distinction to the unmistakably elegant design.

Perfection in a rhythm of its own

The Human Centric Lighting (HCL) function supports biologically effective lighting: the latest LED technology automatically adapts the light to the user's biorhythm, meeting different needs at different times of day.

The consummate mirror cabinet

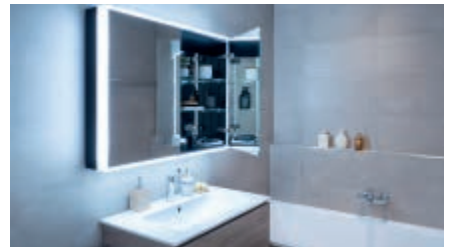

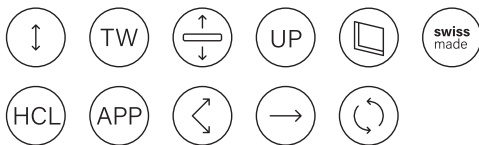

PREMIUM Line Ultimate HCL sets the standard in the superlative class of mirror cabinets. The light can be steplessly dimmed and the light colour can be easily adjusted – from candlelight (2000 K) to bright daylight (6500 K). The ambience is transformed at the touch of a button, supporting any activity in front of the mirror, such as application of make-up, shaving or styling of hair.

With its wide range of control options, PREMIUM Line Ultimate HCL gives architects and users latitude in personal lighting design, guaranteeing unparalleled comfort and convenience.

Installation frame

Can be installed in a flush-mounted version with the universal INSTALLATION FRAME.

Properties

2000 to 6500 Kelvin

Automatic time-of-day control adjusts the light to various brightness levels according to your biorhythm.

Door handle

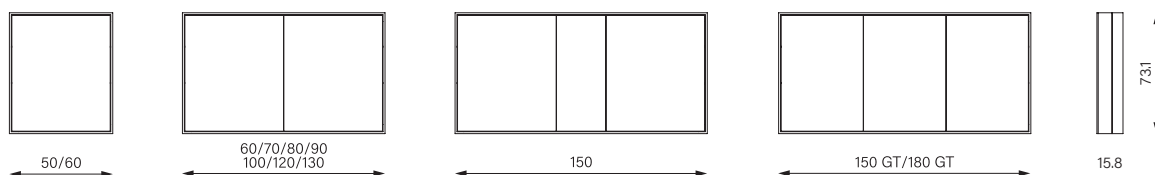

Easy opening thanks to integrated door handles.

App

Convenient control of lighting functions using the integrated membrane keypad or via App.

Colours

The mirror design piece that's worth showing off.

With a narrow strip that wraps around the mirror cabinet and radiates light behind the glass, PREMIUM Line Superior TW combines optical brilliance and luxurious functionality.

The perfection of elegance

PREMIUM Line Superior TW also features a circumferential frame. In this model, the elegance of the design finds its ultimate expression: the mirror doors are on the outside, and from the front a narrow band radiates the light behind the glass, enhancing the optical brilliance of this mirror cabinet of slimline simplicity.

From candlelight to make-up light

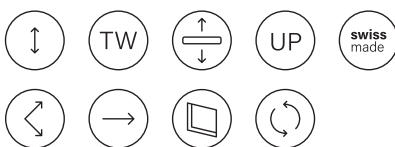

With its Tunable White function, PREMIUM Line Superior TW adapts to your every need in the bathroom. You want to relax in a soothing bubble bath? Then a romantic candlelight atmosphere of 2000 K will help you unwind. Would you like to apply make-up, style your hair or shave? Then a bright daylight colour of 6500 K is best.

The integrated membrane keypad of PREMIUM Line Superior TW allows the light colour to be adjusted and the light to be dimmed steplessly – in order to perfectly match the current activity in the bathroom.

Installation frame

Can be installed in a flush-mounted version with the universal iNSTALLATION FRAME.

Properties

Light colours

Dimmable Tunable White LED strip light, light colour from candlelight (2000 K) to bright daylight (6500 K).

Light behind glass

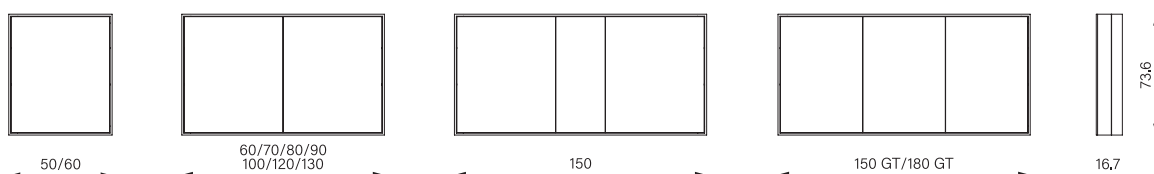

The narrow strip light around the mirror cabinet lends well-being, tailored to your needs.

Lighting functions

Convenient control of lighting functions using the integrated membrane keypad.

Colours

Twice the illumination, simply compelling.

A narrow double strip light blends seamlessly into the mirror surface. Above and below, indirect light provides atmospheric basic illumination with changeable light colour – from candlelight to bright daylight.

Atmospheric basic illumination

The narrow double strip light is seamlessly integrated into the mirror surface along the top, lending discreet elegance to ARANGA Line TW. Two additional bands of LED light can be switched on separately above and below the mirror cabinet. Their indirect light provides atmospheric basic illumination of the bathroom.

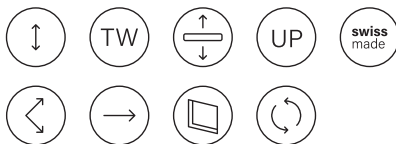

Light colour as you wish

ARANGA Line TW is a premium mirror cabinet with powerful lighting functions and features: The light can be steplessly dimmed using the integrated membrane keypad. And thanks to the Tunable White function, you can change the light colour according to your activity and preferences, from candlelight (2000 K) for a relaxed bubble bath to bright daylight (6500 K) for shaving, hair styling and applying make-up.

Installation frame

Can be installed in a flush-mounted version with the universal INSTALLATION FRAME.

Properties

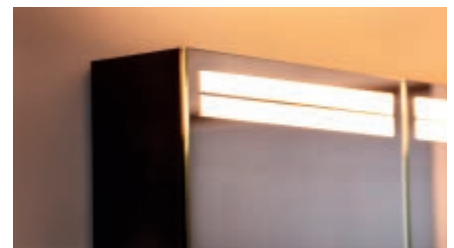

Light colours

Dimmable Tunable White LED strip light, light colour from candlelight (2000 K) to bright daylight (6500 K).

Light functions

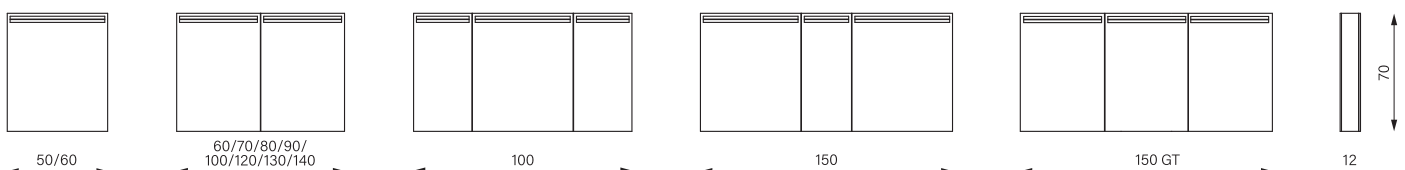

Convenient control of lighting functions using the integrated membrane keypad.

Double strip light

The narrow double strip light, seamlessly integrated into the mirror surface, lends discreet elegance to ARANGA Line TW.

Colours

Showing you in your true light.

An illuminated mirror without visible luminaires: GRACE Line TW stands for exclusivity without frills and flourishes.

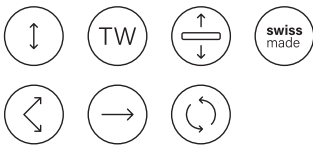

Ambience with a relaxing touch

The narrow strip lights in the mirror discreetly blend into the linear cabinet design. They illuminate the entire room and, at the same time, indirectly illuminate the surroundings from above and below, creating an atmosphere otherwise found only in the finest spas centres.

Coloured light without limits

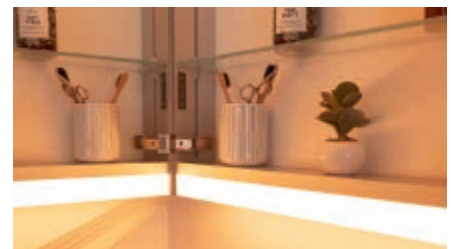

GRACE Line TW sets no limits on individuality. With the Tunable White function, you can also change the dimmable white light depending on the desired ambience – from atmospheric candlelight (2000 K) to daylight for applying make-up (6500 K).

Properties

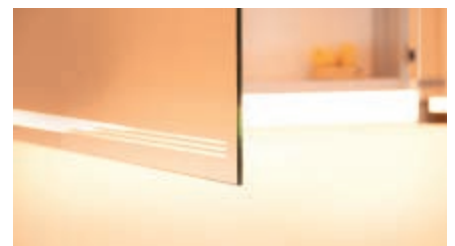

Light colours

Dimmable Tunable White LED strip light, light colour from candlelight (2000 K) to bright daylight (6500 K).

Light functions

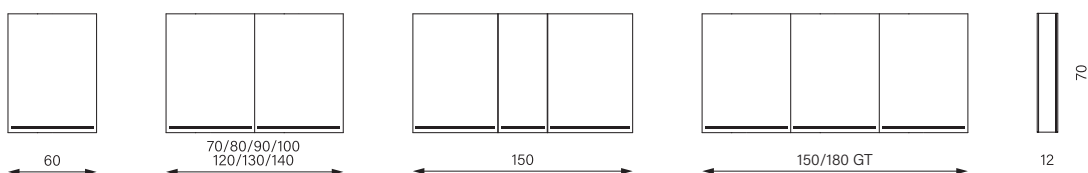

Convenient control of lighting functions using the integrated membrane keypad.

Elegance

The narrow strip light, seamlessly integrated into the mirror surface, lends discreet elegance to GRACE Line TW.

Colours

True beauty comes from vis-à-vis.

Illuminate your room with bright, white light. Immerse your bathroom in the warm glow of a day spa. Tunable White adjusts to your mood.

Elegance in perfect light

There are mirror cabinets whose light is simply never quite right. In the morning, they dazzle with overly bright light, when you are heading out for the evening, you find the illumination is not uniform, and before you go to bed, the light is too cool. And then there is DAILY Line Ultimate TW. With its Tunable White function, the mirror cabinet combines extremely convenient lighting functions for any time of day in an elegant cubic housing with a luminaire positioned above the mirror.

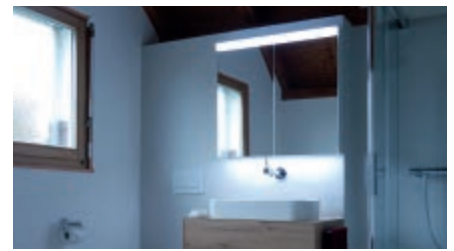

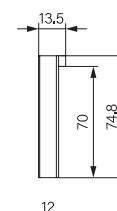

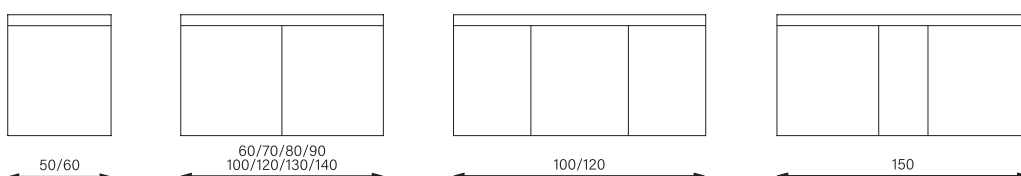

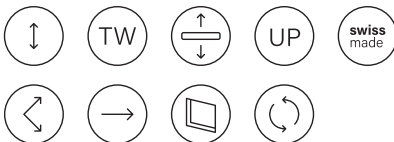

Tunable White: controlling the light colour

The light colour can be controlled using the membrane keypad inside – from candlelight white (2000 K) to daylight white (6500 K). This allows you to easily adjust the light to your mood and your current activity. For a relaxing bath, you choose a warm, romantic light – and for a perfect shave, you illuminate the room brightly.

Installation frame

Can be installed in a flush-mounted version with the universal INSTALLATION FRAME.

Properties

Light colours

Dimmable Tunable White LED strip light, light colour from candlelight (2000 K) to bright daylight (6500 K).

Lamp

An elegantly cubic body with projecting light.

Convenient control of lighting functions using the integrated membrane keypad.

Colour

White

Bringing light into the darkness.

LOW Line deliberately reduces the classic bathroom mirror cabinet to its essentials: function packaged in a linear design.

Minimalism with a certain something

LOW Line Plus LED corresponds to the standard model LOW Line Basic LED – with a certain something that makes a small but subtly luminous difference: The mirror cabinet has two premium LED luminaires with direct light overhead and indirect light below. The two luminaires can be activated and dimmed independently of each other, allowing you to use the keypad inside the mirror cabinet to create the ideal light setting.

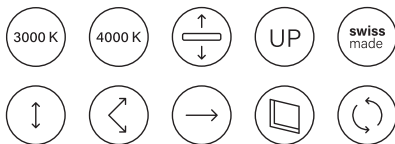

Impeccable craftsmanship and a straightforward appearance

Apart from this, LOW Line Plus LED remains true to itself: It is a minimalist mirror cabinet reduced to the essentials in a clear, linear design. The characteristic cubic lighting at the top is brought forward slightly – the craftsmanship of the quality aluminium profiles is impeccable, and the look is without frills or flourishes. Available in cabinet depths of 12 cm and 15 cm.

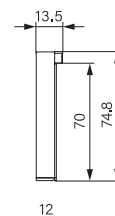

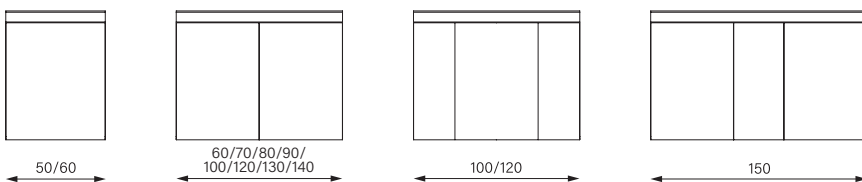

Installation frame

Can be installed in a flush-mounted version with the universal INSTALLATION FRAME.

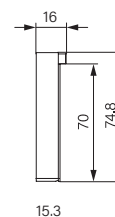

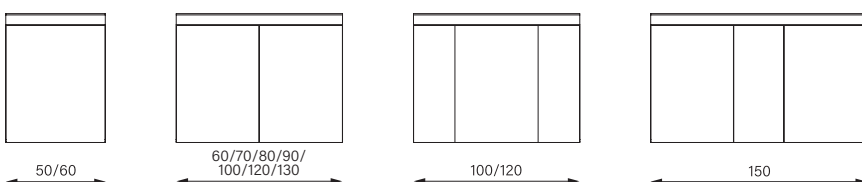

Properties

12 cm:

15 cm:

Glass shelves

Continuously adjustable glass shelves.

Pushbuttons and hinges

Pushbuttons for functions and hinges with door dampers on the inside of the side profile.

Colour

White

Reflecting true beauty.

While LOW Line LED is already reduced to the essentials, LOW Line Basic LED goes one step further - or one step back, depending on your perspective.

Extravagances are foregone - ideal for large projects

Everything remains the same as with the standard version: the simple cubic lighting, the brilliant double-mirror doors, the premium housing made of aluminium profiles.

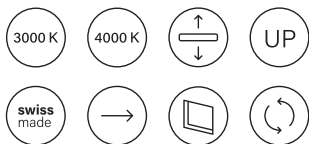

However, LOW Line Basic LED does not afford any extravagances: dimmable light is dispensed with and one luminaire above the large mirror is sufficient. This makes LOW Line Basic LED the ideal mirror cabinet range for large projects and residential buildings in today's rental standard. The large-format mirror surface optically enlarges any guest bathroom, so that it cleverly contributes to your sense of well-being even in small rooms.

There are no compromises in terms of quality: LOW Line Basic LED is also manufactured in the proven Schneider quality in Switzerland. Available in cabinet depths of 12 cm and 15 cm.

Installation frame

Can be installed in a flush-mounted version with the universal INSTALLATION FRAME.

Properties

Glass shelves

Continuously adjustable glass shelves.

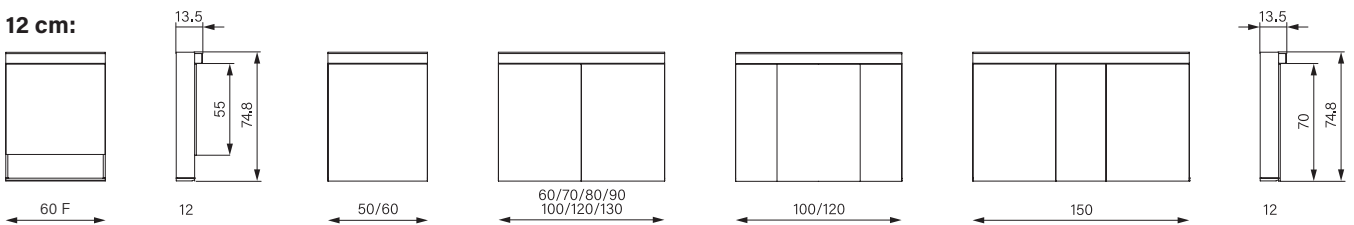

Hinges

Hinges with door dampers.

12 cm:

15 cm:

For a successful start to the day.

LOW Line LED does without inordinate luxury. The range of mirror cabinets is appropriate for any kind of bathroom planning or design, making it ideal for residential developments and large-scale projects in line with modern rental standard.

The simple cubic form of the illumination, the brilliant double-mirror doors and the premium housing stand for long-lasting quality and comfort in true style.

Also the mirror cabinet LOW Line LED consists of white-lacquered aluminium profiles manufactured in Switzerland in trusted Schneider quality. The material is extremely durable and easy to clean.

Properties

Ingenious

Also available with an open cabinet compartment in the width of 60 cm.

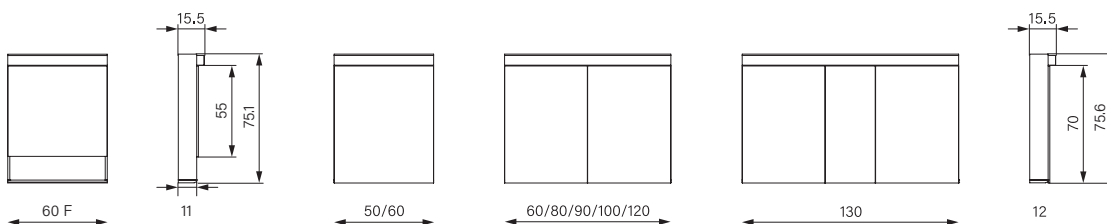

Glass shelves

Continuously adjustable glass shelves.

Colour

White

Budget-friendly, with a little extra.

At first glance, the new OBJECT Line Superior LED appears virtually indistinguishable from its almost identical twin, the OBJECT Line Comfort LED. This model, too, is ideally suited to large projects and impresses with aesthetic, linear design in durable aluminium.

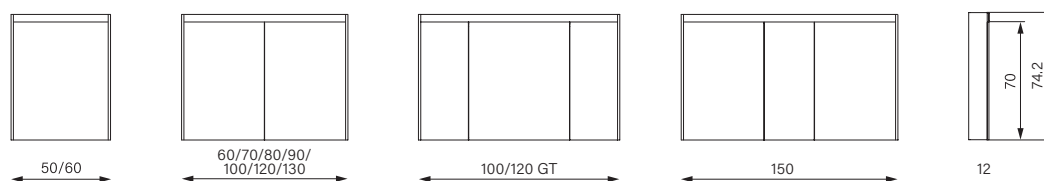

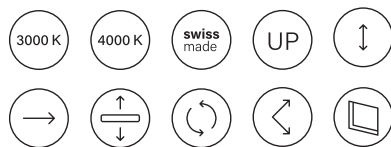

Creating ambience with under-cabinet lighting

The advantage of the OBJECT Line Superior LED: in addition to the premium LED lighting at the top of the mirror cabinet, this model also has a further, recessed LED luminaire on its underside. Both lights can be switched on and off independently via a membrane keypad in the side profile. That means users can create an especially atmospheric ambience. This double light source also means that, in many bathrooms, no additional ceiling lights are needed.

The OBJECT Line Superior LED also has its mirrored door on the inside, elegantly bordered by the narrow aluminium frame.

- Cabinet widths of 50 cm to 150 cm
- 2 LED lights, top and bottom, in warm white (3000 K) or neutral white (4000 K)
- Upper and lower light fittings can be switched on and off individually via the membrane keypad in the side profile
- Continuously adjustable glass shelves
- On-wall and flush mounting without any adjustments

Properties

Pushbuttons and hinges

Pushbuttons for functions and hinges with door dampers inside of the side profile.

LED light strip

Perfect lighting of the basin thanks to light below.

Colour

The perfect choice for large projects.

The new **OBJECT Line Comfort LED** is the perfect mirror cabinet for large projects: **slimline, linear, straightforward and adaptable.**

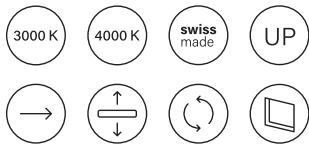

Made from the typical robust aluminium always used at Schneider. Slimline also means: the **OBJECT Line Comfort LED** radiates a high-quality, cabinet-width LED light from the upper edge of the cabinet only – with a choice of warm white (3000 K) or neutral white (4000 K).

Interior door

The **OBJECT Line Comfort LED** embraces Schneider's decades-long tradition of mirror cabinet design: It features an interior mirrored door, elegantly bordered by the narrow aluminium frame.

- Cabinet widths of 50 cm to 150 cm
- LED lamp warm white (3000 K) or neutral white (4000 K)
- On-wall and flush mounting without any adjustments

Properties

Glass shelves

Continuously adjustable glass shelves.

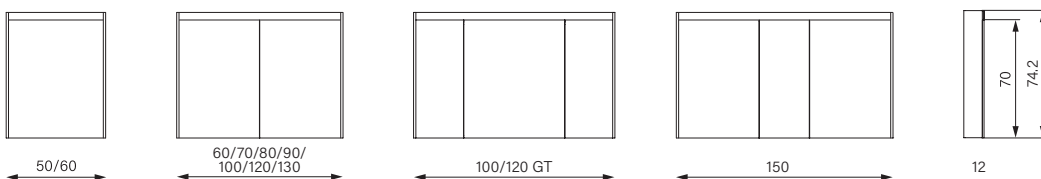

Mirror cabinet design

Narrow side profiles border interior mirrored doors.

Colour

White

So you'll always appear in the best light.

Two lateral luminaire columns - slightly protruding and slightly tilted - evenly illuminate your face with neutral or warm LED lighting.

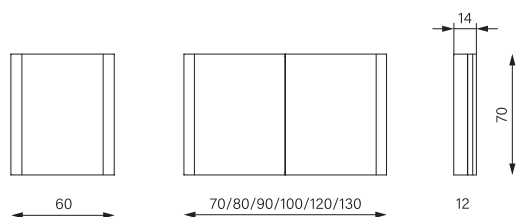

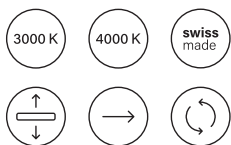

Distinguished illumination

EASY Line Superior LED is the sophisticated cubic mirror cabinet for everyday use, for the guest bathroom – and also for small budgets. Two narrow luminaire columns on both sides, slightly protruding and bevelled, guarantee excellent, uniform illumination of your face. The mirror cabinet consists of white-lacquered, premium aluminium profiles made in Switzerland.

Furnishings with flexibility

The luminaire columns are equipped with durable LEDs in the light colours 3000 K (warm white) or 4000 K (neutral white). The continuously adjustable glass shelves, in true Schneider fashion, allow the cabinet to be furnished with great flexibility to suit your own needs and toiletries.

Properties

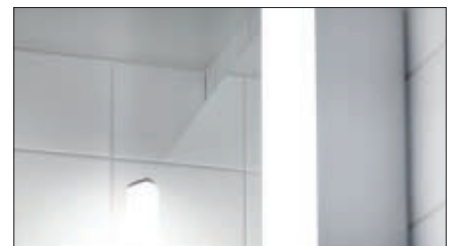

Discreet

Socket at the top right.

Durable

The mirror cabinet consists of white-lacquered, premium aluminium profiles made in Switzerland.

Side light

Two lateral luminaire columns, slightly bevelled and equipped with premium LEDs, illuminate your face evenly.

Colour

White

Minimal – and ingenious.

Featuring ample space, power and continuously adjustable glass shelves instead of built-in lighting, EASY Line Comfort is intelligently reduced to the essentials: a mirror and cabinet.

A great cabinet for small budgets

EASY Line Comfort offers exactly what a mirror cabinet needs to, including plenty of space, an interior that adapts to the needs of the use.

Less is more

EASY Line Comfort dispenses with lighting. This is not only easier on your budget, but also gives you the freedom to implement your own bathroom lighting concept. The continuously adjustable glass shelves also provide plenty of latitude to furnish the interior according to your requirements.

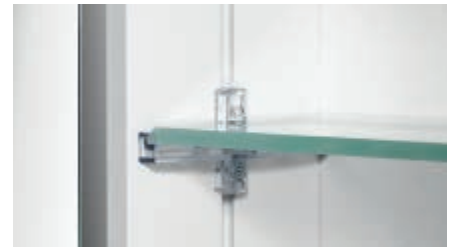

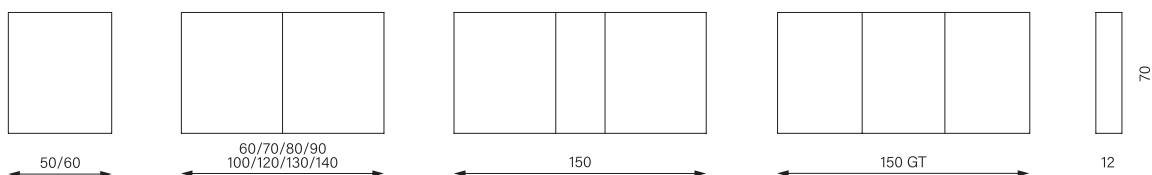

The mirror cabinets of EASY Line Comfort consist of white-lacquered aluminium profiles manufactured in Switzerland in trusted Schneider quality. The material is extremely durable and easy to clean.

In the international version, the mirror cabinet is equipped without a socket.

Installation frame

Can be installed in a flush-mounted version with the universal INSTALLATION FRAME.

Properties

A proven Schneider feature

Thanks to continuously adjustable glass shelves, the interior of the cabinet can be easily adapted to your needs.

Hinges and dampers

Durable hinges that operate effortlessly, doors with dampers.

Colour

White

Simple, but effective.

Straightforward. Attractive. With PATA Line LED, we concentrated on the essentials: on a simple design, on balanced proportions, on premium aluminium profiles – and of course on top-notch lighting.

The versatile all-rounder

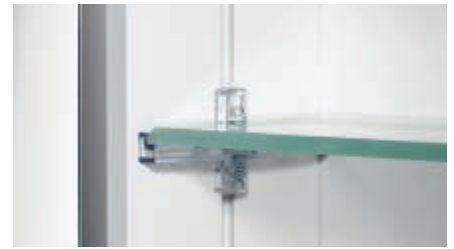

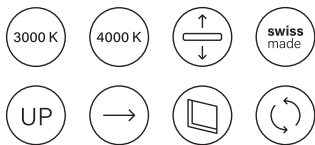

With its neutral design and white-coated aluminium profile, PATA Line LED fits in perfectly into any bathroom style: furniture with synthetic resin fronts or veneer, porcelain stoneware tiles in anthracite, ceramic tiles in colour, plaster or natural stone – PATA Line LED supports the effect of all materials and colours.

You decide what light you want. Select from high-quality LEDs in 4000 K (neutral white) or 3000 K (warm white).

Installation frame

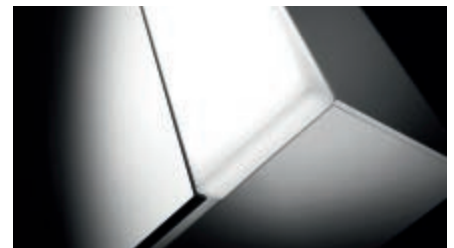

Can be installed in a flush-mounted version with the universal INSTALLATION FRAME.

Properties

Glass shelves

Continuously adjustable glass shelves.

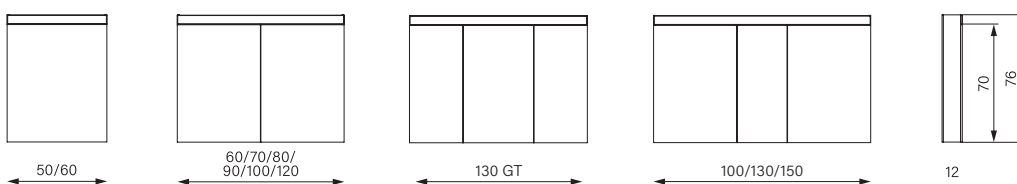

Premium-quality LED light

Simple design meets high quality.

Colour

White

High functionality and comfort for an accessible bathroom.

CARE Line Comfort LED is the further development of Schneider's proven range of mirror cabinets for comfort bathrooms in clinics, hospitals, practices and care homes.

Tiltable mirror

There are several models to choose from, with direct and indirect light, tiltable mirrors and integrated dispenser containers and levers.

Also available without illumination

Tailored to the needs of people with sensitive eyes, the mirror cabinet is available in the light colours 4000 Kelvin (neutral white) or 3000 Kelvin (warm white). If the plans provide for a separate ceiling light, CARE Line Comfort LED without illumination is a good choice.

Hygienic and easy-care, with dispensers made to order

The smooth surface of the white-coated profiles made from high-quality aluminium is both hygienic and robust and can be quickly and easily cleaned. For clinics and practices, dispensers for soap, foaming soap, sanitizer and paper towels can be added to the models, along with arm and hand levers. All the accessories currently available are compatible with the new CARE Line Comfort LED.

Schneider A-Line HCL

reddot winner 2023

The round illuminated mirror with **Dim2Warm** function.

Immerse yourself in a new realm of well-being: the round illuminated mirror captivates with mood lighting with Dim2Warm function, clean lines, and premium materials.

The moon has risen

Bright and clear in the sky, sleek and beautiful in your home: Schneider LUNE SP D2W, the round illuminated mirror with Dim2Warm function, captivates with clean lines and premium materials. The dimmable halo effect casts you and your home in a flattering light. Immerse yourself in the soothing ambience, in a new realm of well-being – for a moment of you-time.

Dim2Warm function

The glare-free light is emitted in an unbroken halo and can be continuously adjusted using the Dim2Warm function from bright daylight (6500 Kelvin with 100 percent luminosity) to warm white (2000 Kelvin with 30 percent luminosity).

Properties

Light control

Light control by button on the lower edge of the illuminated mirror or via App.

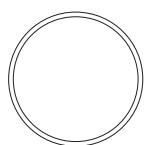

Halo of light

The halo of light radiates seamlessly in a circle and always illuminates the face optimally without shadows.

Colours

 Ground stainless steel

 Black matt steel

Diameter 74

Well rounded.

STYLE Line Ultimate LED is a round illuminated mirror unlike anything the world has seen before. In standard mode, it emits a soft, indirect light - ideal for brushing your teeth, or in a cloakroom, for instance and it boasts a clever added feature.

One gentle press for direct light

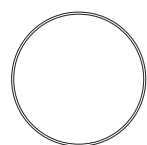

Press lightly on the LED light arc behind the mirror. Instantly, the arc of light moves gently upwards, to shine directly on your face: perfect for applying make-up or shaving.

Inviting in any room

With its dual-zone light, STYLE Line Ultimate LED works beautifully anywhere: in the bathroom, above the dressing table in a bedroom - or in a hallway as a mirror that welcomes guests and household occupants with an inviting light.

- World premiere: round illuminated mirror with indirect light and lowerable direct light
- Indirect illumination from LED strip light running behind the mirror
- Available in light colours 4000 Kelvin (neutral white) or 3000 Kelvin (warm white)

Properties

Diameter 73

Illumination

LED arc of light for direct light, gently press to raise and lower.

Arc of light

When pressed, the arc of light produces a direct light.

Colour

White

Make your reflection smile.

STYLE Line Superior LED is the round illuminated mirror that combines the best of both worlds: indirect light creates an atmospheric ambience, while the direct light simultaneously illuminates your face with no glare.

Simple design, round and on-trend

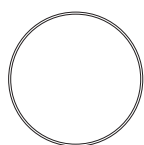

The combination of direct and indirect light in a round illuminated mirror makes STYLE Line Superior LED the ideal choice for rooms such as a guest WC. With its round shape, which is as on-trend as the simple, pared-back design, it makes a real style statement.

Ideal for a small bathroom

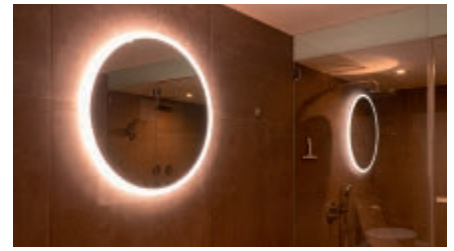

Combined with a main switch on the wall, STYLE Line Superior LED eliminates the need for an additional light source in a small to medium-sized bathroom. The best LED quality currently on the market keeps energy consumption to a minimum.

- Connect to the mains to operate via a wall switch
- Ideal for small and medium-sized bathrooms or guest WCs
- Available in light colours 4000 Kelvin (neutral white) or 3000 Kelvin (warm white)

Properties

Diameter 73

Round and in trend

Its simple design makes it the ideal choice in the guest bathroom.

Illuminated mirror

Round illuminated mirror with direct and indirect light.

Colour

White

Set your scene.

STYLE Line Comfort LED is one of Schneider's first trio of round illuminated mirrors. With its of-the-moment design, it makes a striking contrast to rectilinear architecture and simple, angular furniture design, whether in the bathroom, hallway or even the living room.

Play of light and shadow

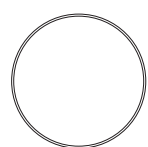

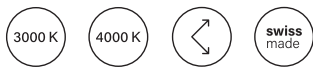

Behind the mirror is an LED strip light, which radiates light in a complete 360° circle, creating an interplay of light and shadow on the wall.

A fresh perspective on mirrors

Think outside the box: curves are in. STYLE Line Comfort LED is a revolutionary new take on illuminated mirrors for the home – or even in bathrooms and WCs in hotels and business premises.

- Connect to the mains to operate via a wall switch
- Available in light colours 4000 Kelvin (neutral white) or 3000 Kelvin (warm white)

Properties

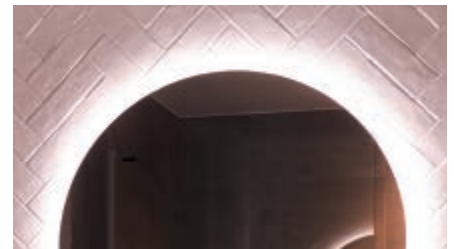

Diameter 73

Indirect light

A stylish eye-catcher also for the living room or entrance hall.

LED strip light

Indirect 360° illumination from LED strip light running behind the mirror.

Colour

White

Come out of the shadows.

The **ADVANCED Line Ultimate TW illuminated mirror** offers almost everything that the eponymous mirror cabinet does: **shadow-free, glare-free, natural lighting with indirect, dimmable light in a choice of light colours.**

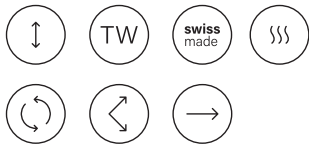

Shadow-free, indirect light

The only difference: this is just an illuminated mirror, with no cabinet. Because of this, it protrudes less from the wall and its appearance is even more delicate and light. The indirect arc of light generates the perfect lighting to evenly illuminate your face and the room in a flattering way, without casting any annoying shadows.

Dimmable light and adjustable light colour

Thanks to the dimmable Tunable White light feature, the light colour can be changed according to your mood, from warm to cold and from romantic candlelight to bright daylight. Also available with mirror heating, for a clear view after a hot shower.

Properties

Light colours

Dimmable Tunable White LED strip light, light colour from candlelight (2000 K) to bright daylight (6500 K).

Membrane keypad

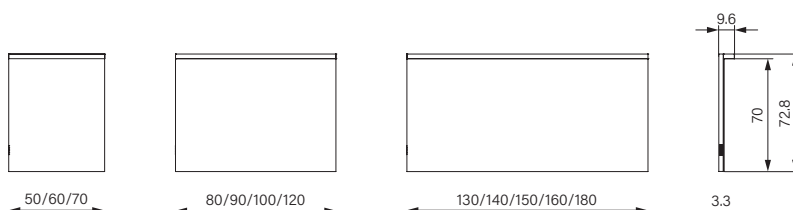

Easy-to-control light functions via integrated membrane keypad.

Arc of light

Indirect arc of light for glare-free illumination of the room and your face.

Colours

Give yourself the eye.

A filigree strip light frames the A-Line HCL illuminated mirror. Premium LEDs and various lighting functions guarantee the utmost of well-being.

Functions and variants to meet every need

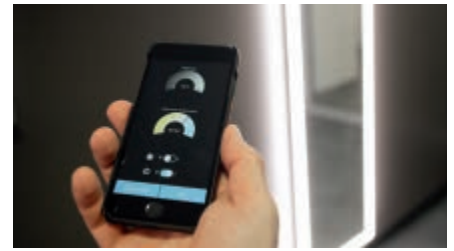

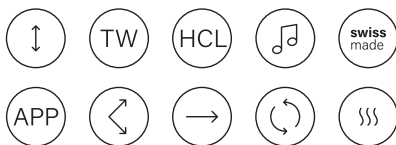

The light of the A-Line HCL illuminated mirror is steplessly dimmable. The high level of lighting comfort is enhanced by an automatic time-of-day control that is adapted to the biorhythm according to the principle of Human Centric Lighting (HCL). The light colour can also be controlled at will on the mirror or using the app – from romantic candlelight (2000 K) to bright daylight (6500 K).

With 12 options in a variety of widths up to 180 cm and in portrait formats of 90 cm and 180 cm, A-Line HCL is also ideal for entryways, dressing rooms, spa rooms and more.

The illuminated mirror with an integrated sound system

The A-Line HCL illuminated mirror also features an optional sound system in hi-fi quality. Simply connect it to your bluetooth devices and your favourite music will accompany you in rich sound while you are at home. Also available with mirror heating, for a clear view after a hot shower.

Properties

App

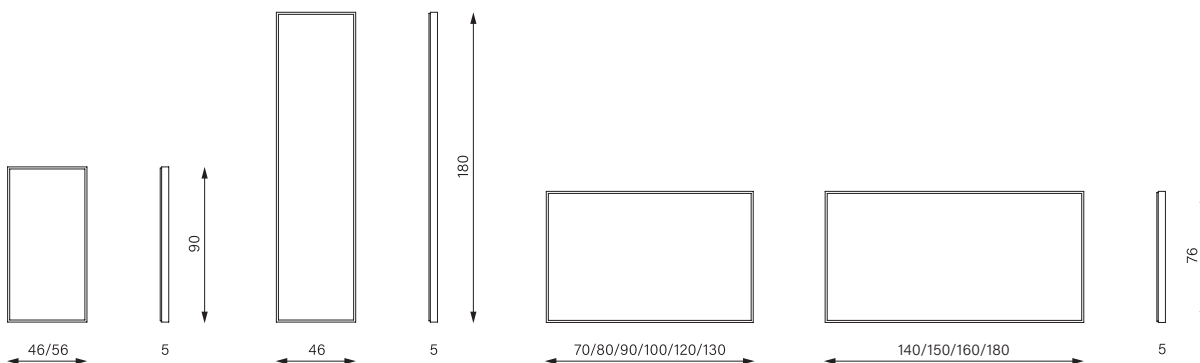

Convenient control of lighting functions using the integrated membrane keypad or via App.

2000 to 6500 Kelvin

Automatic time of day control system adjusts the light to the user's biorhythm with several brightness levels.

Colours

A strip light for life.

Contemporary lighting technology with stylish simplicity.
The ARANGA Line LED illuminated mirror brings discreet elegance to the bathroom, thanks to the narrow double strip light in the mirror surface.

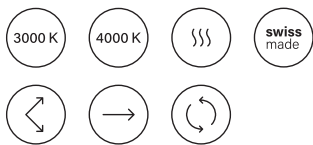

A relaxing atmosphere

The indirect, individually switchable strip lights above and below the illuminated mirror create an atmosphere of well-being. The LEDs are available in warm white (3000 K) or neutral white (4000 K). Also available with mirror heating, for a clear view after a hot shower.

A wide range of sizes

The ARANGA Line LED range includes a variety of models ranging from 50 cm to 180 cm wide, so your new illuminated mirror will fit your bathroom perfectly. Smart: the frame can be mounted and rotated by 180°, allowing space for switches and sockets to be included.

Properties

Light selection

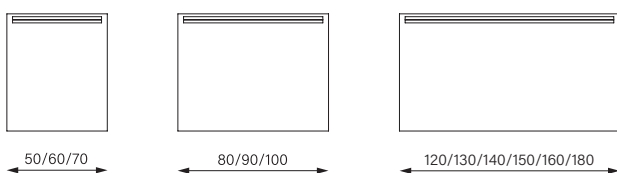

Light in neutral white (4000 K) or warm white (3000 K). Indirect LED lighting above and below, which can be activated individually.

Strip light

A narrow double strip light illuminates the face directly.

Colour

For your moment of illumination.

Slender, elegant, simple. The DAILY Line Comfort LED illuminated mirror fits beautifully in a hallway or guest WC. Its understated, neutral simplicity makes it perfect for large blocks of rental apartments.

Pared-back quality

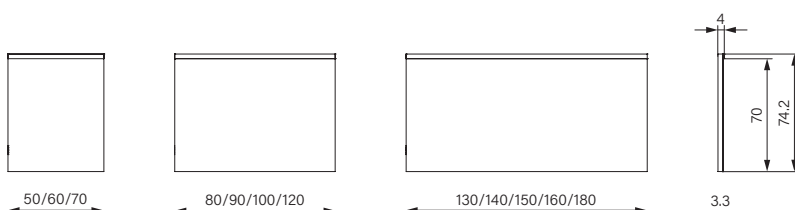

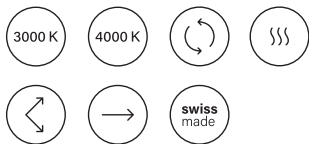

Despite being pared back to the essentials, DAILY Line Comfort LED is manufactured to Schneider's famously reliable quality – in Switzerland, naturally.

Ideal illumination

The two narrow LED strip lights, seamlessly recessed into the top and bottom edge of the mirror, reinforce the elegant appearance and are ideal for illuminating small to medium-sized rooms.

- Exceptional value for money
- Ideal for guest WCs and blocks of rental apartments
- Available in light colours 4000 Kelvin (neutral white) or 3000 Kelvin (warm white)
- Strip light top and bottom, seamlessly integrated into the mirror
- Also available with mirror heating, for a clear view after a hot shower

Properties

LED light strip

Perfect lighting of the basin thanks to light below.

Direct light

Direct light shines on the beholder and illuminates the face.

Colour

White

Detailed features

Dimmable

Mirror cabinet with adjustable light brightness.

Tunable White

Adjustable light colour – from warm candlelight to cold make-up light.

Dim2Warm

Automatically adjusts the brightness to the most pleasant atmosphere.

Human Centric Lighting

Adaptable lighting – from minimal lighting for orienting at night to make-up lighting in the morning.

3000 K

Pleasantly warm, white light ideal for everyday bathroom lighting.

4000 K

Cool, white light ideal for brightly lighting your bathroom and face.

Indirect light

Glare-free light radiates upwards or downwards.

Direct light

Direct light shines on the beholder and illuminates the face.

App

Change the light colour and brightness for each time of day via app.
