

CARE Line Comfort LED

Tilttable mirror

There are several models to choose from, with direct and indirect light, tilttable mirrors and integrated dispenser containers and levers.

Also available without illumination

Tailored to the needs of people with sensitive eyes, the mirror cabinet is available in the light colours 4000 Kelvin (neutral white) or 3000 Kelvin (warm white). If the plans provide for a separate ceiling light, CARE Line Comfort without illumination is a good choice.

Hygienic and easy-care, with dispensers made to order

The smooth surface of the white-coated profiles made from high-quality aluminium is both hygienic and robust and can be quickly and easily cleaned. For clinics and practices, dispensers for soap, foaming soap, sanitizer and paper towels can be added to the models, along with arm and hand levers. All the accessories currently available are compatible with the new CARE Line Comfort.

Colour

White

Versions

(Left) Version with CWS cream, Paper dispenser and aluminium shelf as a Example. (Right) Version with Masterspend hand and arm levers and paper dispenser.

Properties:

3000 K

Pleasantly warm, white light ideal for everyday bathroom lighting.

4000 K

Cool, white light ideal for brightly lighting your bathroom and face.

Continuously adjustable glass shelves

The beloved Schneider system featuring continuously adjustable glass shelves.

Swiss made

Planning, design and manufacturing takes place entirely at the Swiss factory in Flums.

Direct light

Direct light shines on the beholder and illuminates the face.

Sustainability

All mirrors are made of 100% recyclable aluminium.*

* 100% of our aluminium profiles are based on recycled aluminium. This has a used material content of approx. 80%.

CARE Line Comfort LED
