

LOW Line Plus LED

LOW Line deliberately reduces the classic bathroom mirror cabinet to its essentials: function packaged in a linear design.

Minimalism with a certain something

LOW Line Plus LED corresponds to the standard model LOW Line Basic LED – with a certain something that makes a small but subtly luminous difference: The mirror cabinet has two premium LED luminaires with direct light overhead and indirect light below. The two luminaires can be activated and dimmed independently of each other, allowing you to use the keypad inside the mirror cabinet to create the ideal light setting.

Impeccable craftsmanship and a straightforward appearance

Apart from this, LOW Line Plus LED remains true to itself: It is a minimalist mirror cabinet reduced to the essentials in a clear, linear design. The characteristic cubic lighting at the top is brought forward slightly – the craftsmanship of the quality aluminium profiles is impeccable, and the look is without frills or flourishes.

Colour

White

Stepless glass shelves

Continuously adjustable glass shelves.

Lighting functions

Pushbuttons for functions and hinges with door dampers on the inside of the side profile.

Properties:

3000 K

Pleasantly warm, white light ideal for everyday bathroom lighting.

4000 K

Cool, white light ideal for brightly lighting your bathroom and face.

Swiss made

Planning, design and manufacturing takes place entirely at the Swiss factory in Flums.

Dimmable

Mirror cabinet with adjustable light brightness.

Continuously adjustable glass shelves

The beloved Schneider system featuring continuously adjustable glass shelves.

Recessed mounting

The mirror cabinet can be installed in the wall for less protrusion.

Indirect light

Glare-free light radiates upwards or downwards.

Direct light

Direct light shines on the beholder and illuminates the face.
