

STYLE *Line Comfort LED*

STYLE *Line Comfort* is one of Schneider's first trio of round illuminated mirrors. With its of-the-moment design, it makes a striking contrast to rectilinear architecture and simple, angular furniture design, whether in the bathroom, hallway or even the living room.

Play of light and shadow

Behind the mirror is an LED strip light, which radiates light in a complete 360° circle, creating an interplay of light and shadow on the wall. When connected to the mains supply, the illuminated mirror can be switched on and off via a wall switch.

A fresh perspective on mirrors

Think outside the box: curves are in. STYLE Line Comfort is a revolutionary new take on illuminated mirrors for the home – or even in bathrooms and WCs in hotels and business premises.

- Connect to the mains to operate via a wall switch
- Available in light colours 4000 Kelvin (neutral white) or 3000 Kelvin (warm white)

Colour

White

LED strip light

Indirect 360° illumination from LED strip light running behind the mirror

Properties:

3000 K

Pleasantly warm, white light ideal for everyday bathroom lighting.

4000 K

Cool, white light ideal for brightly lighting your bathroom and face.

Indirect light

Glare-free light radiates upwards or downwards.

Swiss made

Planning, design and manufacturing takes place entirely at the Swiss factory in Flums.
